MEMORANDUM FOR: THE RECORD

SUBJECT : Project Monitor at [REDACTED]

25X1

1. Time and Place of Meeting: 23 October 1956, at Devenco,
[REDACTED]

25X1

2. Attendance: [REDACTED]

25X1

3. Discussion:

a. [REDACTED] had both been called away from New York and were not in attendance during the project monitor. However, the undersigned spoke with [REDACTED] via telephone on 26 October and discussed with him the results of the visit.

25X1

b. P-164 - Transmit Button. [REDACTED] has completed the first prototype for the Ericsson telephone button. Two of these units were hand carried to Washington by the undersigned. It has been possible in the design of this button to float the entire circuit from the outer case of the button housing. This then enables the designer to use only one type of transistor (an NPN) for each of the two different polarity conditions. The circuit is :

25X1

25X1

The physical similarity between the transmit button and the regular telephone button is very good.
